World Leading
Water
Purification Brand

About Waterdrop

Waterdrop was founded in 2015 with the wish to provide trustworthy water purification solutions. The brand is dedicated to providing people around the world with high quality products to truly purify their drinking water.

Are You Facing These Issues?

Increased energy consumption

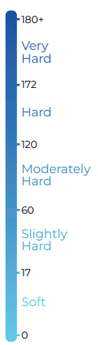
Dry skin and hair

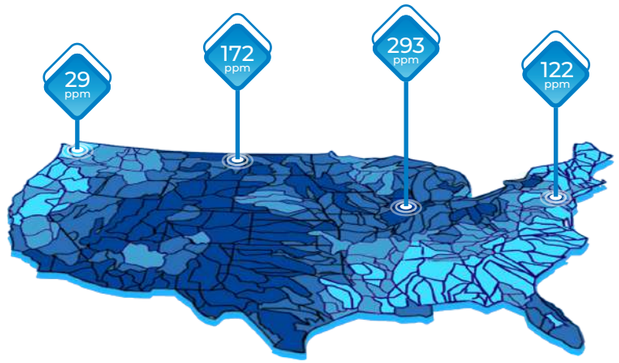
Limescale everywhere

Appliances prone to aging

Ineffective cleaning

Issues Come from Hard Water with Excessive Ca^{2+} and Mg^{2+}





Water Hardness Scale (PPM)

*Data source: https://www.usgs.gov/media/images/map-water-hardness-united-states

Upgrade Your Water System with Waterdrop Water Softener!

Waterdrop water softeners eliminate hard water issues by removing excess minerals, saving money on energy and repairs, extending appliance lifespan, and delivering softer skin, silkier hair, and spotless clothes.

Reduce Ca2+ & Mg2+, Get Softer Water

With **Up-flow Regeneration Tech**, the Waterdrop water softening system takes less salt for more soft water.

Durable Materials, Long-Lasting Performance

High-sealing Ceramic Valve
Leak-free & Long-lasting

High-strength Resin Tank
Durable in Use

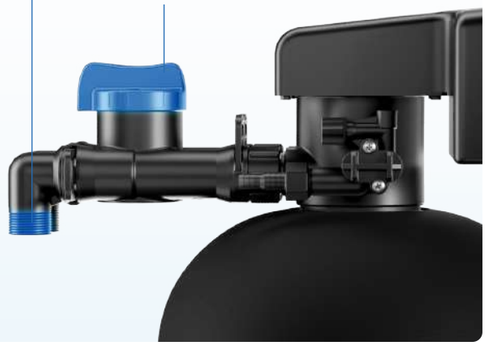
Premium Protective Cover
High-quality wetsuit material, moisture-resistant and cold-proof

*Please install a whole house filter before using the softener.
*The components meet the requirements of NSF standard Material Safety testing.

User-friendly Design, Convenient to Get Soft Water

1" Diameter:
High flow rate, powerful water supply

Bypass Valve:
Adjustable water flow, uninterrupted supply



Professional LCD Display:
Real-Time visibility

Bypass Adjusting Bolt:
Adjust water hardness for comfort and health

Quick Installation, Easy Usage

With pre-assembled core components and a highly automated process, smooth operation is ensured.

For optimal resin filtration, please connect the softener to the Whole House Filter.

*Please don't intall the system outdoors.

Choose the Suitable Waterdrop Water Softener System

*The components meet the requirements of NSF-standard Material Safety testing.

- Family-friendly use
- Meets NSF standards*
- Durable & Long-lasting
- Easy operation
- Money-saving
- Saves salt & water
- Longer applicance life
- Softer skin and hair
- Spotless laundry

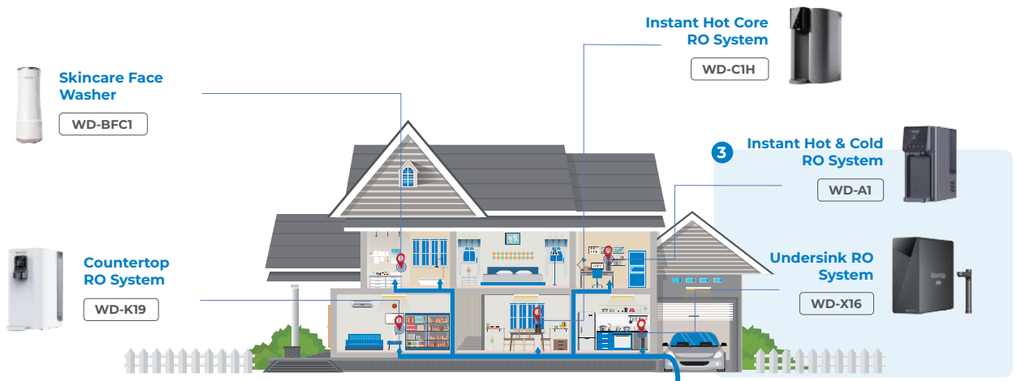
Resin Filling Amount	56L

Why You Need A Residential Water Treatment Solution?

You’ ve been thinking about water filtration – maybe you even have a whole house water filtration system or a drinking water filter already. But combining a whole house filtration system with a drinking system provides you with multiple lines of defense against water contaminants and their effects on your health.



1

Spin Down Whole House Water Filter
WD-BG100

3-Stage Whole House Water Filter
WD-WHF3T-FG

WD-RPFK15

WD-WHF3T-FG

Customers whose domestic water supply comes from a well water source are recommended to choose WD-RPFK15 & WD-WHF3T-FG.

2

Whole House Water Softener
WD-WHR01

1

Pre Filters——First line of defense against water contaminants

Waterdrop pre water filters use 5-micron PP cotton to intercept large particulate matter such as Sediment, Rust, Dirt, Sand, Silt, etc., and composite carbon to double dechlorinate and improve the quality of water.

2

Water Softner: Guardian of Household Pipes & Skin & Hair

Hard water will cause a scale build up inside your plumbing system, even tends to leave buildup on your hair and skin, making it dry and your hair brittle. Using a water softener can effectively resolve such issues.

3

RO Water System: Ultimate guardian for Drinking Water

A RO system can help address many of the potentially harmful pathogens and impurities in tap water, including: bacteria, viruses, PFAS, lead, nitrates,mercury, particulates, and more.

Customized Water Purification for Every Home

We offer a range of residential water filtration solutions to meet the varying needs of different households. Please choose the water filtration solution that best suits your desired water quality and household size. If you require additional products outside of the package or need assistance in selecting the most suitable solution, please consult our local distributor for professional guidance.

Whole House Water Filter System
For whole-house filtration.

- **Waterdrop 2-Stage Whole House Water Filter System**

WD-WHF21-PG

- 5-stage effective filtration
- **97% chlorine reduction**
- 6-Month lifespan, GAC filter improve water taste
- Durable, high-capacity, stable flow
- Easy installation
- Protects water appliances

WD-WHF21-FG

- 5-stage effective filtration
- **Pre-iron & manganese reducing filter**
- 6-Month lifespan, GAC filter improve water taste
- Durable, high-capacity, stable flow
- Easy installation
- Protects water appliances

- **Waterdrop 3-Stage Whole House Water Filter System**

WD-WHF3T-PG

- NSF/ANSI 372 certified
- 7-stage filtration improve water quality
- **97.2% chlorine reduction rate**
- Longer lifespan & easy installation
- Protects household water appliances

WD-WHF3T-FG

- NSF/ANSI 372 certified and SGS tested
- 7-Stage filtration provide you pure water
- **Pre-iron & manganese reducing filter**
- Advanced activated carbon filter

Whole House Water Softener
Reduce water hardness and provide soft water

- **Waterdrop Whole House Water Softener**

WD-WHR01B

- **Removes 48,000 grains, ideal for small households**
- Efficient regeneration technology, save salt and water
- 8% cross-linked resin for enduring soft water
- Reliable warranty, eliminates your worries
- Highly durable ceramic valve head for longer lasting use
- Smart design, hassle-free water use
- Customize softness, enjoy healthy water

WD-WHR01C

- **Removes 64,000 grains, ideal for large households**
- Efficient regeneration technology, save salt and water
- 8% cross-linked resin for enduring soft water
- Reliable warranty, eliminates your worries
- Highly durable ceramic valve head for longer lasting use
- Smart design, hassle-free water use
- Customize softness, enjoy healthy water

Undersink RO
Multi-layer filtration provides high-quality pure water

- **Waterdrop Undersink Reverse Osmosis System**

WD-X10

- **1000GPD** high capacity brings ultimate experience
- **9-stage** filtration
- Compact & tankless design simplifies Installation process
- Smart digital faucet
- 3:1 pure to drain ratio

WD-X14

- **1400 GPD** rapid flow brings ultimate experience
- **11-stage** filtration & automatic UV sterilization
- **Alkaline mineralization** provides healthier water
- Compact & tankless design simplifies installation process
- Smart digital faucet
- 3:1 pure to drain ratio

WD-X16

- **1600 GPD** high capacity brings ultimate experience
- **11-stage filtration & LED function** guarantee water safety and quality
- **Boost health with beneficial minerals**
- NSF/ANSI standard 58 & 372 certified purity for healthy drinking
- Smart digital faucet
- 3:1 pure to drain ratio

WD-K6

- **First-to-market** RO system with heating function
- **600 GPD capacity** for fast & stable water flow
- **5-stage deep filtration** effectively reduces TDS, chromium, PFAS, etc.
- **NSF/ANSI 372 Certified**, providing with healthier water
- **Smart touch display faucet** adjusts temperature from 104℉ to 203℉
- 2:1 pure to drain ratio
