PURONICS® Terminator® iGen®

The Next Generation of Ionics® Solutions

Terminate Your Water Problems with the Newest Generation of Water Treatment.

The Puronics Terminator® iGen® series whole-house water conditioner incorporates the most technologically advanced equipment available today. A system so sophisticated, it does the thinking about the quality of your water all day and all night so you don't have to. The digital control valve calculates the amount of water being treated and notifies you when it's time to replace the Puronics Silvershield® HYgene® filter. The iGen® also gives you control of your water with three regeneration options to maximize the water quality in your home. Backed by nearly 70 years of technology, performance, and reliability, the Puronics Terminator® iGen® will filter and soften your water for life.*

**Lifetime warranty, additional restrictions may apply.*

Hair and skin are soft and silky

Food tastes better

Dishes are cleaner

Better tasting beverages

PURONICS® Terminator® iGen®

The Next Generation of Ionics® Solutions

Patented iGen® Computerized Control with SilverShield® HYgene® Monitor

- iGen® intelligent digital microprocessor controls system operations
- Notifies homeowner when SilverShield® HYgene® Bacteriostatic filter needs to be replaced based on water volume
- Maintains 60 days of water usage history to maximize backflush/recharge efficiency
- Double backwash ensures a clean filter media bed
- Built-in diagnostics ensure consistent superior quality water
- Creates auto reserve so you never run out of quality water
- Durable, corrosion resistant 1" control valve construction guarantees years of trouble-free, efficient operations
- Downflow brining system ensures minimum water usage and efficient salt dosage

NASA Technology at work in your home

- MicroSilver Bacteriostasis™ Technology is based on NASA silver ion technology developed to purify water on the Space Shuttle Orbiters.
- SilverShield® HYgene® filter media - incorporates MicroSilver Bacteriostasis™ Technology into activated carbon to inhibit bacteria growth within the system's filter media while reducing objectionable tastes and odors.

WQA tested and certified according to NSF/ANSI 44 for reduction of hardness minerals and NSF/ANSI 372 for low lead compliance.

Covers Models MP820B, MP1030B and MP1240B

This product does not protect users from bacteria, viruses and other disease organisms.

System contains EPA registered Bacteriostatic HYgene®

E.P.A Environmental Protection Agency REGISTERED No. 35900-2 No. 35900-3

INDEPENDENTLY NSF CERTIFIED

iGen® Digital Control Valve

Stainless Steel Tank

- Food grade 316L stainless steel provides a sanitary non-permeable surface for processing your water
- The only stainless steel tank certified to NSF standards in the water treatment industry

MicroSilver Bacteriostasis™ Technology

- Microscopic particles of silver are embedded into SilverShield® HYgene® media to inhibit bacteria growth within the filter media bed

Refiner

- SilverShield® HYgene® media reduces objectionable chlorine and chloramine tastes and odors

Conditioner

- High-Capacity S-759 monospheric resin has uniform sized beads for higher flow rates and efficiencies
- Reduces iron, turbidity and hardness

Clarifier

- Silica gravel polishes water to a sparkling clarity

Backflush Tank

Potassium or Salt

Float and Distributor Assembly

Potassium or Salt Solution

This system is designed for use with municipal water or private well water that has been chlorinated. Any non-chlorinated private well application should use the well version of this system without SilverShield® HYgene®.

Your Authorized Independent Dealer:

Contaminants or other substances which can be removed by the Puronics® Terminator® iGen® system are not necessarily in your water. Operational maintenance and replacement requirements are essential for the product to perform as advertised. Actual savings achieved are dependent on your particular spending habits and usage levels.
